TerraALL

Every earthwork job. Any size. Anywhere.

STRATEGY OVERVIEW

The Digital Face of Everglades Restorations

Why we're building TerraAll, how it works, and why Everglades Restorations & Land Clearing Inc. is uniquely positioned to multiply its reach — one job, one video, one page at a time.

Found | Trusted | Routed | Growing

Prepared for Matt & Sam
Everglades Restorations & Land Clearing Inc.
October 2026

Produced and Powered by MEDIAIN360

01 · THE IDEA

Every Job Gets the Call

From the $100 driveway culvert to the $100 billion restoration program, every earthwork request should come to one place first — and that place should be yours.

Nobody is going after the small jobs. Almost nobody can handle the giant ones. Everglades can do both.

Today, most earthwork demand is scattered: homeowners search for "lot clearing near me," developers call whoever they used last time, agencies post bids on a dozen portals, and prime contractors scramble for qualified subs. No single company is set up to catch all of it.

TerraAll changes that. It's a digital front door built to catch **every** request — then put it in front of the one person who knows exactly what to do with it.

Found

On Google, Maps, YouTube, AI assistants and government bid portals — for every service, every size of job.

Trusted

Real licenses, real job videos, real compliance — in plain view, the moment someone lands.

Routed

Every request sorted and put in front of Matt, who decides what happens to it.

02 · THE NAME

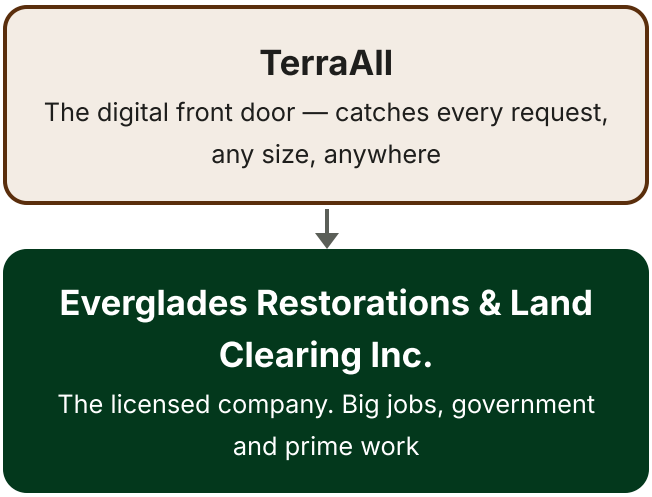

Why "TerraAll"

Terra means earth. **All** means every job, every size, every place.

The name says what the company does without boxing it into a region. It's short, easy to say, easy to remember and easy to type — the kind of name people repeat to each other.

Why not just "Everglades"?

- **Everglades stays.** It's the licensed, bonded, insured company with 35 years of trust — and the name procurement officers see on SAM.gov, licenses and bonds.
- But on its own, "Everglades" reads as one region, and online it competes with the government's massive "Everglades restoration" program for attention.
- TerraAll is the wide-net front door; Everglades is the proven company behind it. Together they cover every buyer.

Same company, different door. TerraAll is a registered trade name of Everglades Restorations & Land Clearing Inc. Every TerraAll page says so and shows the license number.

03 · THE ADVANTAGE

Why Matt & Sam Are Uniquely Positioned

A lead network is only as good as the judgment behind it. Most networks are run by marketers. TerraAll is run by people who have done the work for 35 years.

35 years in the field

Since 1992 — the kind of history agencies, primes and owners trust immediately.

The hardest ground there is

Wetlands, canals, muck and mangrove edges. "Built in the Everglades. Ready for Anywhere." If the crew can work here, it can work anywhere.

Their own equipment and crews

Self-performing capability means real answers on scope, schedule and price — not guesses.

Public-work credentials

Army Corps project experience, FEMA-ready storm response, compliance programs (Drug-Free Workplace, E-Verify) and registrations that open government doors.

Subject-matter judgment

Matt can size up a job from plans, photos or a video — anywhere in the world — and know who should do it.

Real footage

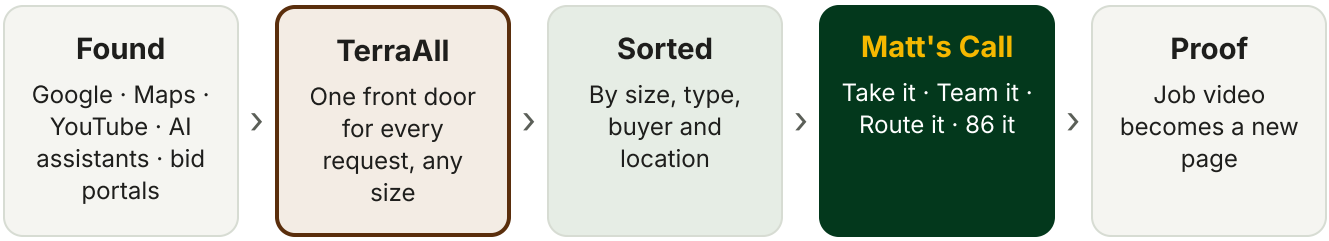

Years of job videos: the proof most competitors simply don't have, and the raw material for thousands of pages.

The result: every request that comes through TerraAll is judged by an expert — so the right jobs grow Everglades and the rest still earn.

04 · HOW IT WORKS

The TerraAll Ecosystem

One engine, many doors. Every request follows the same path — and every finished job makes the engine stronger.

↻ **Every new page brings in more requests — the engine feeds itself.**

1 · Found everywhere people look

Pages built around the real words buyers use, short spoken-style answers for voice and AI assistants, YouTube job videos, and procurement-friendly pages for agencies and primes.

2 · One front door

Whether it's a homeowner's driveway or an agency solicitation, the request lands in the same place, with the details needed to judge it.

3 · Sorted automatically

Requests are scored behind the scenes — agency and large jobs flagged first, commercial next, small jobs ready to route — so nothing waits.

4 · Matt decides, proof feeds back

Matt makes the call on every job. Each completed job is filmed, dated and published as its own page, which brings in the next request.

05 · EVERY JOB, MATT'S CHOICE

Take It. Team It. Route It. Or 86 It.

TerraAll never obligates Everglades to anything. It simply makes sure every opportunity gets the call — and Matt chooses what happens next.

EVERGLADES DOES IT

Take It

The jobs that fit Everglades best — large clearing, restoration, government and prime work, storm response. The crew does the work and the job becomes proof.

EVERGLADES LEADS

Team It

Everglades runs the job and brings in a licensed partner for a specialty or extra capacity. Bigger jobs, without turning anything away.

A PARTNER DOES IT

Route It

Jobs that are too small, too far or too specialized go to a vetted, licensed, insured partner — and Everglades earns points on the work.

NO OBLIGATION

86 It

Not a fit? Pass. No cost, no commitment, no hard feelings. The request still taught the system what buyers want.

Why this matters

Today, the small jobs go nowhere and the far-away jobs go to someone else. With TerraAll, every request either grows Everglades directly, grows it through a partnership, or earns on someone else's work. Matt's expertise becomes revenue in more ways than one.

The referral and partner structure (how points are earned, partner licensing and insurance requirements, and what's disclosed to customers) is set up once with the company's attorney before launch.

06 · WHERE AND WHEN

From Home Base to Anywhere

Home base	Statewide	National	International
Where the reputation lives	Every job, every county	As partners and jobs open each place	Projects Anywhere

A place goes on the map only when a real job has been done there. That keeps every location page honest — and keeps search engines rewarding it.

The phases

0 Launch Everglades

Fill in real licenses, photos and videos. Go live on the real domain. Google Business Profile, reviews and directory listings.

1 Turn on the content engine

Every job video becomes a dated page. The most-asked questions get answered in Matt's words. Request sorting goes live.

2 Stand up TerraAll

Name and domain secured, trade name registered, partner standards set, and the TerraAll front door launched: "Any earthwork. Any size. Anywhere."

3 Scale with real data

Permit guides by county, cost guides from real jobs, hundreds of answered questions, partner job pages — tens of thousands of genuinely useful pages over time.

4 Go wide

Statewide, then national, then international — each place opening as jobs and partners exist there.

07 · THE THINKING

Why We're Building It This Way

Procurement first

Big contracts are won on trust. Licenses, registrations, bonding, compliance and a one-page capability statement sit where contracting officers look — on every page.

Real proof, not stock photos

Every claim links to evidence: dated job videos, credentials and compliance policies. Buyers believe what they can see.

Growth search engines reward

Search engines penalize mass-produced, thin pages. Every TerraAll page is backed by a real job, a real answer or a real guide — so the library can grow very large, safely.

Built for voice and AI

Short, direct answers first, then the detail — the format voice assistants and AI tools use when they recommend a company.

Video as the engine

YouTube is one of the biggest places people search. Every video does double duty: proof for buyers and a new door for search.

Clean, fast, accessible

A calm, professional design that loads fast on any phone and meets accessibility standards (WCAG 2.1 AA) — something agencies increasingly expect.

One engine, many doors

One question bank, one video pipeline, one sorting system — powering both the Everglades site and TerraAll.

Owned outright

The site, the content, the videos and the domain belong to the company. Nothing is rented; everything compounds.

08 · WHERE WE ARE

Already Built

The foundation is in place on a preview address, ready for the real details.

- **Digital business card** with QR code, every license, capability statement and save-contact
- **Full preview website** built for procurement officers and every kind of buyer
- **Capability map** covering land, water, cleanup, infrastructure, disaster and rural work
- **Printable capability statement** on one page
- **Matt's service checklist** — tap "do it," "team it" or "not for us" for every service
- **Question bank** of real buyer questions for voice and AI search
- **Legal & compliance pages** including Drug-Free Workplace and E-Verify
- **Accessibility audit** passed on every page

Who Does What

Matt & Sam	The subject-matter experts. Approve concepts, supply footage, licenses and answers, and make the call on every job: take it, team it, route it or 86 it.
MediaIn360	Creative direction, brand strategy, development and launch of every signed-off concept — plus project management for all outside vendors (video, drone, legal review and more) until everything is built out and live.
Partner network	Vetted, licensed and insured specialists for the jobs Matt chooses to route.

09 · NEXT STEPS

What We Need to Go Live

From Matt & Sam

- Every license and registration number
- Phone, email, headquarters and hours
- Job photos, especially before-and-afters
- 2–3 best clips for the homepage video, plus job videos with name, date and place
- Service checklist answers
- Answers to the most-asked buyer questions
- The domain name(s)

To set up TerraAll

- Trademark search and domain secured
- Trade name registered to the corporation
- Attorney review of the partner and referral structure
- Partner standards: licensing, insurance, quality
- Launch the TerraAll front door

The goal

Every earthwork request, from the smallest job to the largest program, gets the call — and Everglades decides what to do with it. Built in the Everglades. Ready for anywhere.

Every Earthwork Job.
Any Size. Anywhere.

TerraAll — a service of Everglades Restorations & Land Clearing Inc.
