YOUTUBE PLAYBOOK

Every Job You Film Becomes Proof

How to set up the channel, post your videos and get them to us.

YOUR CHANNEL

EVERGLADES
RESTORATIONS & LAND CLEARING INC.

MEDIAIN360

THE WHOLE IDEA

You Film It. We Build the Page.

Five simple steps. Your part takes a couple of minutes per video. Everything after that is on us.

YOU

Film

Before, during and after on the job site.

YOU

Upload

Post it to the company YouTube channel.

YOU

Copy the Link

Share → Copy link. That's the short link.

YOU

Log It

Paste it on the Video Log page and tap Send.

MEDIAIN360

Job Page

We turn it into its own page on the website.

Every video adds one more real, dated job to the website.

WHY VIDEO

Your Footage Is Your Biggest Advantage

It Proves the Work

Agencies, primes and owners want to see it done. A real job on video beats any brochure.

It Gets You Found

YouTube is the world's second-biggest search engine, and its videos show up in Google too.

It Builds the Website

Each video becomes a job page. Over time, hundreds of real jobs nobody else in the trade can show.

You've already got years of footage on your phones. This turns it into business.

STEP 1

Create the Channel

1. **Use a company Google account,** not a personal one.
   Example: the company Gmail. The channel should belong to the business.
2. **Go to youtube.com and sign in.**
   On a computer is easiest for setup.
3. **Tap your profile picture → Create a channel.**
   If you already have one, go to Settings → Add or manage your channels.
4. **Enter the name and handle** from the next slide.
5. **Add the logo and the website link.**
   We'll send you the logo file sized for YouTube.

Keep the login safe.
Write down which account owns the channel and turn on 2-step verification. Matt and Sam stay the owners.

You don't need to give us your password. We only need the video links.

STEP 2

Name & Handle

CHANNEL NAME

Everglades Restorations & Land Clearing

HANDLE (YOUR @ NAME)

@EvergladesLandClearing

If that handle is taken, try @EvergladesRestorations or @EvergladesLandClearingInc.

Same Name Everywhere

Match the website and the license paperwork, so people (and Google) know it's the same company.

Ready for TerraAll

A channel can be renamed later. When TerraAll launches, every video, view and subscriber comes along.

STEP 3

Upload Your Videos

The Backlog

The footage already on your phones and drives.

- Upload in batches from a computer
- Start with your biggest and best jobs
- Then a few at a time, whenever you have a minute

New Jobs

Going forward, right from the job site.

- Upload from the YouTube app on your phone
- Same day is great; same week is fine
- Wi-Fi saves your data plan

Visibility

Public
Best choice. Anyone can find it on YouTube and on the website.

Unlisted
Fine for sensitive jobs. Works on the website, hidden from YouTube search.

Private
Don't use. Nobody can see it, including the website.

STEP 4

Title Every Video the Same Way

Type of work — City, State — Month Year

Land Clearing — City, State — March 2026

Canal Excavation — City, State — June 2025

Hurricane Debris Removal — City, State — October 2024

~~IMG_4471.MOV~~

Don't know the exact month? The year is fine. Can't name the place? Use the region or the state. The description can stay blank; we handle the rest.

STEP 5

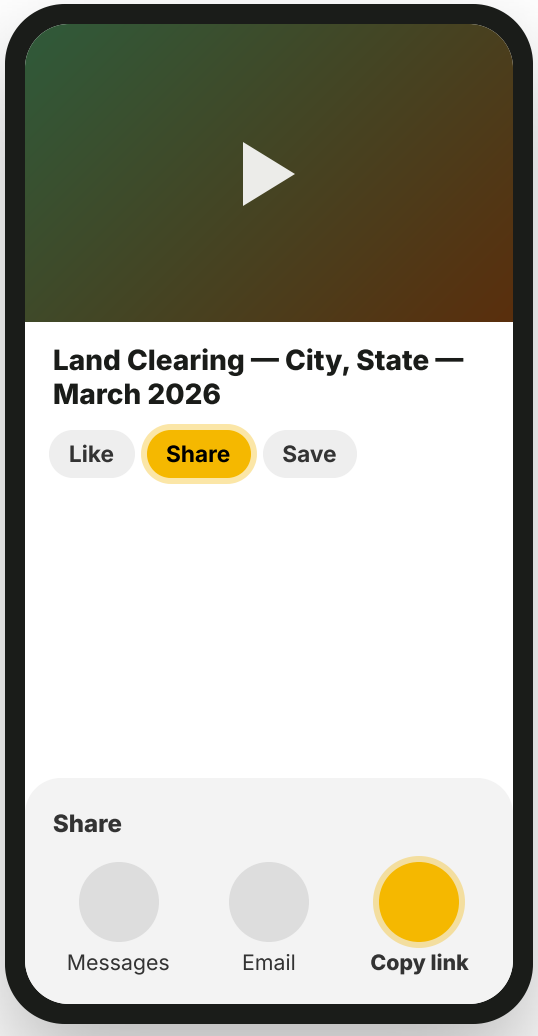

Get the Short Link

1. **Open the video** in the YouTube app.
2. **Tap Share.**
3. **Tap Copy link.**
   On a computer: Share → Copy.

That copies the short link. It looks like this:

youtu.be/A1b2C3d4E5f

That short code is all we need to put the video on its job page.

STEP 6

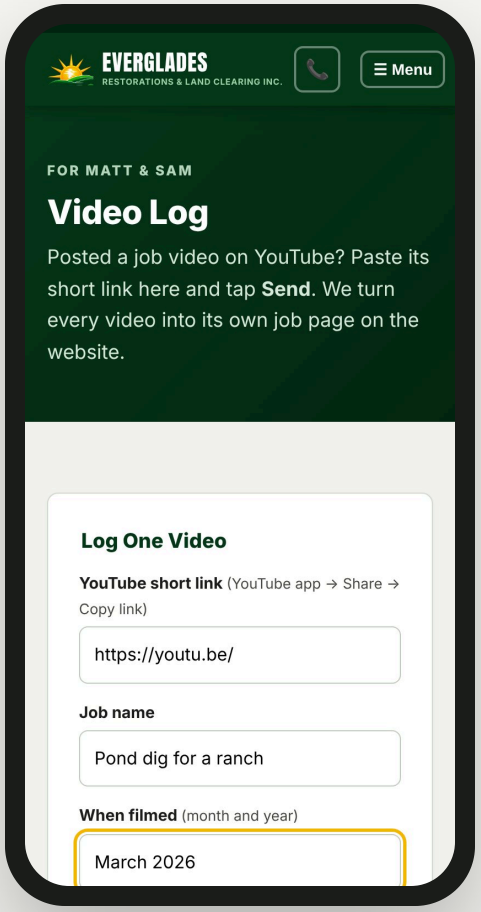

Log It on the Video Log Page

Your own page on the website. Save it to your phone's home screen.

cyan-owl-411515.hostingersite.com/plan/videos/

1. **Paste the short link.**
2. **Add what you know:** job, when, where, type of work.
   Only the link is required. A few words help a lot.
3. **Tap Send.** It comes straight to us.

Got a pile from the backlog? Paste a bunch of links at once, one per line. The address moves to the real domain at launch.

FOR THE WEBSITE'S OPENING VIDEO

Send Us Your Best Clips

The video at the top of the home page needs the original files, full quality, straight from the camera or phone.

- **Big machines, wide views, drone shots**
- **Before-and-after from the same spot**
- **Held sideways, steady, no text or music added**

How to Send

Drop them in the shared Google Drive folder we set up for you, or send with WeTransfer. Both handle big files.

Not by Text or YouTube

Texting and YouTube shrink the quality. We need the originals.

Stored Safely

MediaIn360 keeps them on our server and edits the website's opening video from them.

ON THE JOB SITE

Filming Tips

📱 Hold It Sideways

Horizontal fills the screen on YouTube and the website.

📍 Same Spot, Three Times

Before, during and after from the same place. That's the shot that sells.

🌄 Start Wide

Show the whole site first, then move in on the machines.

✋ Keep It Steady

Slow pans. Brace your arm or set the phone on the truck.

⏱️ Short Is Fine

Thirty seconds to a few minutes. Real beats polished.

🎙️ Say What It Is

Optional: "Clearing ten acres of pepper trees for a new pond." It helps people follow along.

BEFORE YOU POST

Privacy Do's & Don'ts

Do

- ✔ Ask the owner or agency before posting their job
- ✔ Use Unlisted when a client wants it low-key
- ✔ Show the crew in hard hats, vests and proper gear
- ✔ Show the site cleaned up at the end

Don't

- ✕ Show house numbers, license plates or people's faces without their OK
- ✕ Film where a contract or agency says no cameras
- ✕ Post anything that looks unsafe or like an accident
- ✕ Mention prices, bids or client disputes

WHAT HAPPENS NEXT

Your Checklist

- [ ] **Create the channel**
  Company Google account, 2-step verification on
- [ ] **Set the name and handle**
- [ ] **Upload your first batch of best jobs**
- [ ] **Log each short link on the Video Log page**
- [ ] **Send your best clips to the shared folder**

Then MediaIn360

- Builds a job page for every video
- Links it to the right services and places
- Edits the opening video for the home page

Later (optional): give MediaIn360 **Editor** access to the channel so we can add captions and links back to the website for you. Editor can't delete the channel or change who owns it, and you can remove it anytime.

YOUTUBE PLAYBOOK

Film the Work.
We'll Make It Count.

Every video is one more real job the world can see.
